**Q1. Does this lighting plan meet the needs of your community?**

**No; Please tell us why?**

I said no because I am not a lumin expert and this question is misleading. Does it do the job I have no idea did you follow the recommendations of an expert or did you do what is normally done? Is the RMWB meeting lighting requirements of the laws or regulations that pertain to the area. What I would like to say is that most live in this area because we do not like the bright lights and big city. To say it is for security if you truly think about it the RCMP are not going to leave the city unless someone is caught and being assaulted. The people living in the area rely more on the neighborhood to provide security and protection. Do I want trail entrances and paths/sidewalks lit to reduce tripping of course

**Q2. Are there any ways to improve this plan?**

**Yes; Please tell us how?**

Are the street lights themed to match the existing park lights or are the sterilized city lights in a country setting a take it or leave it the only option.

**Q3. Do you have any additional comments?**

**Yes**

What is the extra yearly costs to the neighborhood / Individual home owner

Q1. Does this lighting plan meet the needs of your community?

Yes

Q2. Are there any ways to improve this plan?

**Yes; Please tell us how?**

#1 would be useful if it were placed further up Gregoire Ave as that stretch is dark. #5 could be of better use in the middle of the street (aspen acres) before the mailboxes. #7 would be useful either on the same street as #6 or #8, as there are lights in the Pergola by the park

Q3. Do you have any additional comments?

No

Q1. **Does this lighting plan meet the needs of your community?**

**No; Please tell us why?**

The placement on a few lights needs to be moved

Q2. **Are there any ways to improve this plan?**

**Yes; Please tell us how?**

We don't need lights doubled up at the entrances or at the park. The park has its own lights that help

Q3. **Do you have any additional comments?**

**Yes**

Move #1 down the street 100 feet or so, move #7 around the corner on poplar, space 5-6 out along the stretch on Gregoire avenue

Q1. Does this lighting plan meet the needs of your community?

**No; Please tell us why?**

There's not enough

Q2. Are there any ways to improve this plan?

**Yes; Please tell us how?**

Add more than is in the plan

Q3. Do you have any additional comments?

No

Q1. **Does this lighting plan meet the needs of your community?**

**No; Please tell us why?**

Don't think we need more street lights

Q2. **Are there any ways to improve this plan?**

**Yes; Please tell us how?**

Don't need new street lights in the middle of the streets. Just ones on the corners is fine

Q3. **Do you have any additional comments?**

No

**Q1. Does this lighting plan meet the needs of your community?**

**No; Please tell us why?**

I came out here to live in quiet and piece and to enjoy the outdoors, wildlife. I have no desire for that to be wrecked by streetlights. If I want to live in an urban community I would live in the town.

**Q2. Are there any ways to improve this plan?**

**Yes; Please tell us how?**

I don't want streetlights

**Q3. Do you have any additional comments?**

**Yes**

If I want to live in an urban environment I would live in town. I enjoy the wildlife, the peace and quiet. I don't wish for that to be changed.

Q1. Does this lighting plan meet the needs of your community?

Yes

Q2. Are there any ways to improve this plan?

**Yes; Please tell us how?**

Lights 3 and 9 could be more centered on the street. Light 10 could be directly across from the other light for more even lighting and that would put it beside RMWB property for winter access to the UGS site. ??

Q3. Do you have any additional comments?

**Yes**

I think the extra lighting at the entrances of the HWY is needed, very dark in the winter months and also alerts HWY traffic of the upcoming entrances.

Q1. Does this lighting plan meet the needs of your community?

Yes

Q2. Are there any ways to improve this plan?

**Yes; Please tell us how?**

Ensure new power lines are over head to avoid digging up the roads again.

Q3. Do you have any additional comments?

**Yes**

Do not dig up the roads for the power, keep over head.

Q2. Are there any ways to improve this plan? No

Q3. Do you have any additional comments? Yes  
i like it they are well spaced ! if you are keeping the current ones  
and adding the new lights then i like it great job !

Q1. Does this lighting plan meet the needs of your community? Yes

Q2. Are there any ways to improve this plan?

**Yes; Please tell us how?**

The lights currently in place have a very small light spread. Maybe a different type of light could be used to make a wider lighting area.

Q3. Do you have any additional comments?

No
